Recently in the environment of distributors of medical equipment including sellers of cosmetic equipment, are increasingly the question arises is there a need for consular legalization of documents which are presented to the health Ministry for state registration of medical products. In this regard, the Federal service for supervision in the sphere of health has published the letter which notifies the subjects of circulation of medical devices the position of the Ministry of foreign Affairs of Russia on the question of the need for the legalization of technical and operational documentation for foreign medical device manufacturers. Mead argues that consular legalization of Russian and foreign official documents is carried out in accordance with Administrative regulations. It is said that the official documents issued by foreign state authorities shall be legalized by the Ministry of foreign Affairs of the country of origin of products and therefore already have the appropriate details official stamp of the state body issued the document an official stamp and signature of the authorized official. The very absence of these mandatory requisites is already a basis for refusal in providing the state service of the Russian consular missions abroad. Accordingly, when data availability of details of technical and operational documentation for any product may not be classified as official documents of the socio-legal and consular legalization is not subject. Experts cosmetic exhibition Cosmo-Expo note that the question is not idle between 2014 and 2017 Russia will host registration certificates for medical products and some companies will have to collect documents again 25.03.2014 Do not scold the administrator to better teach This course administrator and the head often goes together that is the way of understanding and starts the interaction. Classes in any city at any time without interruption of work. First test which identifies gaps in knowledge and then training begins in the final
